SUMMARY

Computer Science graduate from KIIT University (2026) with hands-on experience in Machine Learning, AI-based solution development, and problem solving through academic projects and an internship at Grant Thornton Bharat LLP. Proficient in Python and experienced in building predictive applications and interactive dashboards. Strong analytical and Critical thinking skills with the ability to translate complex challenges into practical, data-driven solutions.

EDUCATION

B Tech in Computer Science Engineering <i>Kalinga Institute of Industrial Technology</i>	2022 – 2026 Bhubaneswar, India
Higher Secondary School Certificate(CBSE) <i>Shivam Convent High School</i>	2020 – 2022 Patna, India
Secondary School Certificate(ICSE) <i>St. Joseph's Convent High School</i>	2010 – 2020 Patna, India

EXPERIENCE

Summer Intern – New and Emerging Technologies <i>Grant Thornton Bharat LLP</i>	06/2025 – 07/2025 Delhi, India
• Researched Generative AI trends, tools, and business applications using analytical and problem-solving approaches • Analyzed emerging technology use cases and summarized findings into structured reports and presentations • Collaborated with teams to identify workflow improvement opportunities using GenAI solutions • Presented insights and recommendations in a clear and actionable format • Worked independently on research-driven tasks in a professional consulting environment	

PROJECTS

Smart Spend	
<i>Python, FastAPI, Google Gemini API</i>	
• Integrated Google Gemini API to intelligently parse and categorize expenses from voice inputs, text, and receipt images • Built OCR pipeline using Pillow to extract expense data from uploaded receipt images for automated tracking • Designed expense categorization logic and AI-generated spending insights for budget summaries and financial reports • Developed and tested REST API endpoints for expense tracking, budget management, and analytics using FastAPI	
Incident Risk Predictor	
<i>Python, Pandas, NumPy, Scikit-Learn, Streamlit, Plotly, Joblib</i>	
• Built a Random Forest classifier achieving 86% accuracy to predict whether IT incidents would become critical, based on category, priority level, response time, and affected users • Developed an end-to-end ML pipeline covering data preprocessing, model training, and deployment via an interactive Streamlit dashboard with incident severity visualization • Designed to support IT operations teams in prioritizing high-risk incidents, reducing manual triage time and improving service availability decisions	
Slum Radar	
<i>Python, Scikit-learn, TensorFlow, Streamlit, Pandas</i>	
• Built a Random Forest Classifier achieving 85%+ accuracy to predict health risk levels (High/Medium/Low) based on sanitation scores, disease outbreak risk, and malnutrition rates • Developed a Gradient Boosting Regressor to prioritize infrastructure needs (toilets, schools) across 300+ urban data points • Implemented a time series forecasting pipeline to predict slum formation trends using population and resource data • Performed end-to-end data preprocessing, feature engineering, and model evaluation using Scikit-learn and Pandas	

SKILLS

Programming Languages: Python, Java, SQL
Core CS Concepts: DSA, OOPs, DBMS
Artificial Intelligence & Machine Learning: Artificial Intelligence, Machine Learning, Deep Learning, NLP
Generative AI: Prompt Engineering, Generative AI Fundamentals
Data & Visualization: Streamlit, Power BI, Matplotlib
Frameworks & Libraries: TensorFlow, Scikit-learn, Pandas

CERTIFICATIONS

• AI-ML Virtual Internship by AICTE and EduSkill	• Generative AI: Introduction and Application	• Generative AI: Prompt Engineering Basics
• Prompt Engineering for ChatGPT
